Profile

Recent B.Tech graduate in AI-ML with a strong foundation in Java, Python, SQL, Data Structures & Algorithms, and backend software development. Experienced in building REST APIs, scalable backend applications, and AI-powered solutions using modern frameworks. Passionate about Java backend engineering, microservices architecture, and developing high-quality software while continuously expanding expertise in Spring Boot and enterprise technologies.

Experience

GenAI Intern, DStarix Techno Pvt Ltd

July 2026 – Present

- Developed backend APIs for AI-powered applications using FastAPI and REST principles.
- Built modular services integrating LLMs, RAG pipelines, and modern AI frameworks.
- Optimized backend workflows and collaborated with developers using Git.
- Assisted in debugging, testing, and documenting application features.

AI Intern, Autom8x

July 2026 – Present

- Integrated Claude-based AI capabilities into backend applications.
- Developed API workflows and contributed to scalable software solutions.
- Collaborated with developers to improve application functionality and performance.

Skills

- **Programming:** Java, Python, SQL, C++, JavaScript
- **Backend:** REST APIs, FastAPI, Spring Boot (Learning), Microservices Concepts
- **Databases:** SQL, SQLite, SQLAlchemy, Relational Databases
- **Tools:** Git, GitHub, Maven, Postman, HTML, CSS
- **Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Software Development

Projects

AI Resume Optimization Platform

GitHub

Developed a modular backend application using Python, SQL, FastAPI, and REST APIs.
Designed scalable APIs for resume parsing, semantic search, and ATS scoring.
Integrated relational databases and optimized backend performance.

AI Document Assistant

Live Demo

- Built scalable backend services using FastAPI, LangChain, and FAISS.
- Implemented REST APIs and semantic search for efficient document retrieval.
- Designed a modular architecture for processing and analyzing large document datasets.

Kepler Planetary Signal Review System

Live Demo

- Developed a machine learning application with Python and XGBoost, achieving 89% recall.
- Built REST APIs for prediction services and automated classification workflows.
- Improved backend processing efficiency, reducing manual analysis effort by approximately 70%.

Education

B.Tech in Artificial Intelligence & Machine Learning

Guru Tegh Bahadur Institute of Technology
CGPA: 8.8

2022 – 2026
